Education

Amrita Vishwa Vidyapeetham, Coimbatore
B.Tech in Computer Science and Engineering

2023 – 2027
CGPA: 6.92 / 10

Experience

Kanavu Startup Village, Erode
Developer Intern

April 2026

- Developed and enhanced responsive web application features using modern web technologies.
- Collaborated with mentors and team members to build, test, and debug software modules.
- Identified and resolved software bugs while improving code quality and maintainability.
- Used Git for version control and followed Software Development Life Cycle (SDLC) practices.
- Strengthened problem-solving, teamwork, and communication skills through collaborative software development.

Projects

MediStock AI – Pharmacy Inventory & Billing Platform

 [GitHub](#)

- Full-stack pharmacy system for inventory, billing, and prescription workflows.
- Batch-level tracking with FEFO, expiry alerts, low-stock alerts, and Excel bulk upload.
- Built AI demand forecasting using Holt-Winters and TensorFlow.js LSTM.
- Gemini-based chatbot with voice input and Tamil TTS for inventory queries.
- Implemented JWT auth, RBAC, audit logs, and notifications via Nodemailer and Twilio.
- Tech: React, Node.js, Express, MongoDB, TensorFlow.js, Gemini API

LinguaEase – Accessible Language Learning Platform

 [GitHub](#)

- Built a MERN-based platform for learners with dyslexia, ADHD, and autism using personalized accessibility features.
- Implemented JWT authentication, multilingual lesson support, and user progress tracking.
- Integrated Text-to-Speech and Gemini AI for audio-assisted learning and quiz generation.
- Developed REST APIs with Express.js and MongoDB for lessons, preferences, and progress management.
- Tech: React, Node.js, Express.js, MongoDB, JWT, Gemini API

Secure Student Complaint & Feedback System

 [GitHub](#)

- Secure MERN-based complaint management platform with end-to-end hybrid encryption.
- Implemented AES-256, RSA-2048, JWT authentication, and role-based access control.
- Added 2FA (TOTP), bcrypt password hashing, and secure complaint tracking.
- Built responsive dashboards for Students, Faculty, and Admin.
- Tech: React.js, Node.js, Express.js, MongoDB, AES-256, RSA-2048, JWT, Speakeasy

Smart Classroom Automation

- Motion-based entry/exit tracking using PIR sensors to monitor occupancy.
- Automated lights and door using LEDs and a servo motor.
- Added buzzer alerts and a digital display for count tracking.
- Simulated and tested in Tinkercad.
- Tools: C, Embedded Systems, PIR Sensor, Servo Motor, LED, Buzzer

Skills

- **Languages:** Java, Python, JavaScript, C
- **Frontend:** React.js, HTML, CSS
- **Backend:** Node.js, Express.js, REST APIs, JWT
- **Databases:** MongoDB, MySQL, SQL, Firebase
- **Cloud:** AWS (EC2, S3, IAM)
- **AI/ML:** TensorFlow.js, Gemini API
- **Tools:** Git, GitHub, VS Code, Postman
- **Core:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
